## Flower Garden Journey

Take a flower hike on our educational trail and Daisies will discover what it would be like to be a plant, search for flowers and their pollinators and even taste a sample of what bees make using nectar.

## Cheers for Animals Journey

Hop, jump, crawl and slither along with our animal friends in this creature filled journey! Find out what animal needs are and how they communicate. Hear some animal legends and discover some of the birds at Hidden Valley.

## Clover Petal

Daisies will enjoy reading Clover's story and learn about how they can use our resources wisely just like Clover does! They will discover some useful things they can use out of regular trash and embark on a scavenger hunt.

## Rose Petal

Daisies will enjoy reading Rosie's story here at the nature center and how they can do simple things to clean up and reduce trash just as Rosie does. The girls will do a trash pick up along our trail and participate in an exciting "Reduce, Reuse, Recycle" relay race.

## Bugs Legacy Badge

Brownies learn just how amazing and important bugs are to us and our environment. Brownies will get to meet some of our resident arthropod friends up close and personal. Scientific tools of the trade will be used out on the trail in search of insects in their natural habitat. Scouts will get to make a "buggy" craft.

## Hiker Activity Badge

Brownies will discover every trail leads to new adventures. Before going out on trail, they will make an energy packed trail mix. They will set up trail signs and lead the way along our educational trail. The TEN Essentials will be covered and why you should always hike with them. They will create scavenger hunts and trade with a friend. Using their imaginations, they will discover if they have what it takes to survive a night in the woods.

## Native American Program

The Tongva tribe resided along the Santa Ana River centuries ago. The Brownies will be able to experience life along the river as they hike down to our "village," play instruments and learn native songs, grind seeds, and use a pump drill to make a shell bead necklace.

## Animal Habitat Badge

Have you ever wanted to meet a live snake up close and personal? Junior Girl Scouts will have the opportunity to interact with several of our animal ambassadors. They will learn about the animal's unique adaptations that help it to survive in its natural habitat. They will also learn about local endangered and threatened species and ways that they can help protect them. Lastly, they will make a bird feeder to take home.

## Trees Legacy Badge

While on a hike, Cadettes will be introduced to five native trees found in the riverbed. Some of these trees have edible fruits or nuts and they will learn the importance of proper identification before consuming anything in the wild. They will learn why trees are important within their habitat and their role in our survival. The pros and cons of logging will be discussed. Cadettes will have the opportunity to "adopt" one of our trees and learn proper care for it. Lastly, they will paint a tree cookie necklace to take home.
