SNAKE

SQUIRREL

TROUT

Cool Facts:

- There are over 60 different species of eagles, including the North American bald eagle and the African crowned eagle.
- Eagles have amazing eyesight, which they use to hunt prey.
- Eagles can spot a rabbit at a mile away and locate fish underwater from hundreds of feet in the air.
- Eagles eyes are about the same size as human eyes, but eagles can see at least four times better than people.
- If your vision was as good as an eagle's, you could read a newspaper from across a whole football field.
